## EDUCATION

---

**Kingston University** || Kingston upon Thames, United Kingdom  
*B.Sc. (Hons) in Computer Science*

**September 2025**  
First-Class Honors

**Chartered Institute of Marketing (CIM)** || Berkshire, United Kingdom  
*Level 7 Postgraduate Diploma in Professional Marketing*

**March 2024**  
Merit

**Gateway College Kandy** || Kandy, Sri Lanka  
*Edexcel IGCSE & NCC Education International Foundation Diploma*

**August 2022**  
Distinction

## PROJECTS

---

**SmartDrive** *Driving School Management App – ReactJS, Tailwind CSS, Node JS (Express JS), Supabase*  
(In Progress) Developing a full stack driving school management application to streamline operations and enhance student driver experience. Includes Role-Based Access Control, Scheduling System, LMS, Notifications System (SendGrid and Twilio SMTP), PayPal Integration, User Dashboard with CRUD operations for students, instructors, and admins.

**Fundr** *Crowdsourced Fundraising App – ReactJS, Tailwind CSS, Node JS (Express JS), Supabase*  
Developed a web-based application for crowdsourced fundraising during the final year SDP module. Developed PayPal integration, email authentication, and campaign management workflows. Set up database schema and implemented CRUD operations.

**Computer Hardware Workshop** *Education Presentation - Power Point, MS Word*  
Co-presented a workshop on computer hardware to Diploma of English students. Responsibilities included pre-event coordination (documenting agendas, tracking attendance), preparing the presentation, and delivering it to a live audience.

## **Pizza Ordering System**

*Console-based GUI App - Java (Design Patterns)*

Developed a console-based GUI application allows users to order customizable pizzas. Implemented key design patterns, including Observer, Builder, and Decorator, to enhance code modularity and maintainability.

## **Grifindo Payroll System**

*Employee Payroll Software - C#, Visual Studio, MS SQL Server*

Created a C#-based payroll system to streamline employee data management. Designed features for data input, storage in MS SQL Server, and automated calculations to generate accurate payroll reports.

## **Photography Website**

*Portfolio Website - HTML5, CSS3, JavaScript, PHP, MySQL, Apache Server*

Developed a responsive website for freelance photographers. Implemented image gallery, service cards with dynamic pricing, and contact form. Deployed locally using Apache Server.

## **eHab**

*Hackathon-Winning Mental Health App Prototype - Figma, PowerPoint*

Prototyped a mental health app that includes assessments, mood tracking, support groups, and educational resources. Conducted research and UX design. Presented concept and wireframes at inter-campus hackathon (Winner)

## **REFERRALS**
